

2021 -2022 RVWET – ERRP TOWN CREEK RESTORATION ENRICHMENT PROJECT MODULE 1, KIT 1 “LEARNING TO OBSERVE” MATERIALS LIST

Here is a list of materials you will receive in “Kit #1”. It is fine to make up your own kits if you prefer.

- 1) Plastic mesh zipper Bag – to hold supplies
- 2) Small colorful, blank journal
- 3) Color Pencils
- 4) Sketching Pencil
- 5) Magnifying Glass
- 6) 8-inch ruler

Additional Downloads (can be ordered as well):

- 1) Learn to Observe Exercises pdf
- 2) Simple Sketch Lessons for Fun and Confidence
- 3) Examples of types of Journals – science, nature, observation, adventures
- 4) Mini Field Guides (Color pages for younger and older students)

BASIC GOALS:

Give students tools to go outside and really look around at what is around them. To be able to keep a simplified record by recording observations into their journals. Students can make journals as simple or as complex as they desire.

The tools in this kit can be used on classroom or individual Stream-walk fieldtrips during the Town Creek Restoration Project. Additional tools you might add could be: cameras, thermometers, rubber gloves, pH kits, containers if collecting anything. The photo below was taken by Talia Rose.
